

**BubbleBee** is a therapy centre that specializes in helping children to overcome speech and language related problems.

**BubbleBee** provides extended speech-language therapy services including a variety of specialized approaches and methods. Our Speech Therapist will propose the best method (or a fusion of different/several methods) for your child and will apply these techniques during the therapy sessions. We offer a set of effective and proven speech therapy approaches, including:

- **oral-motor therapy** for children with muscle and sensory-based issues such as drooling, low muscle tone or difficulties with feeding;
- **PROMPT** (Prompt's for Restructuring Oral Muscular Targets) for kids with speech delays and/or motor issues;
- **The Lidcombe program** for young children with stuttering problem;
- **M.O.R.E.** for individuals with speech and language difficulties secondary to oral-motor, postural, sensory and regulation problems;
- **DIR/Floortime** approach to support those diagnosed with Autism Spectrum Disorder or other related developmental difficulties;
- **PECS** (Picture Exchange Communication System) for nonverbal individuals that need alternative methods of communication

**BubbleBee** also offers on a regular basis special group training programs for parents based on **Hanen** principles:

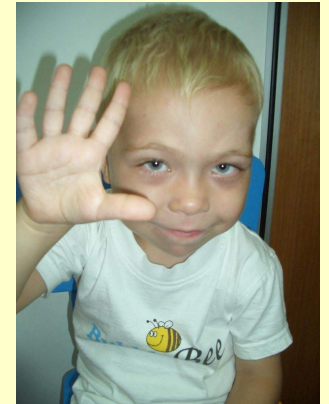

- **It Takes Two To Talk** for parents of children with speech and language delays;
- **More Than Words** for parents with children diagnosed (or before diagnosis) with Autism, PDD, Asperger's Syndrome and other social-communication difficulties.

**BubbleBee** offers speech and language services to children aged 2 to 15 years old, however we may arrange appointments for kids below the age of 2, if this will be necessary.

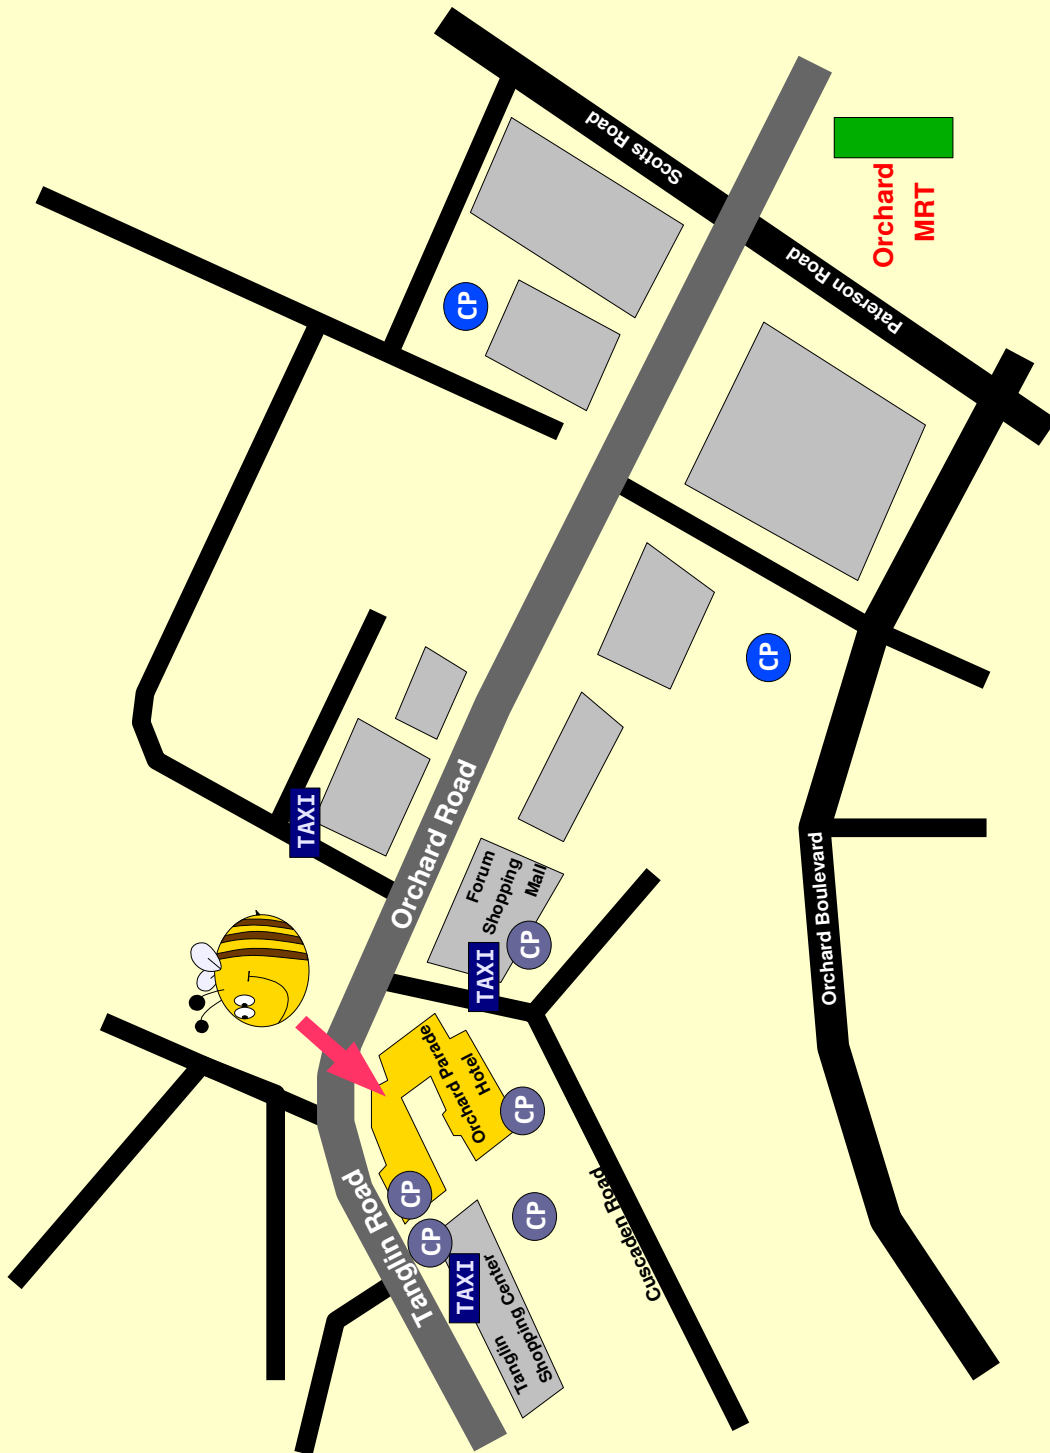

In **BubbleBee** we are working with children with variety problems and/or diagnosis:

- Speech and language delays;
  - Autism Spectrum Disorder;
